INTERNATIONAL PROFILE GROUP

Easy opening

PremiDoor has innovative door-opening mechanisms which seems to glide in the air. Large glass surfaces open almost without sound. Vitalizing air flows inside giving a natural feeling of good climate.

Feel comfortable

The true values of PremiDoor come to the fore with the first autumn storms. Top quality is manifested with an innovative sealing system and perfectly matched levels. This ensures resistance to wind, rain and outside noise.

Enjoy in view

PremiDoor allows you to enjoy the summer. The stable design allows large glass surfaces with a large field of view. Your living room gets the widest possible views with an ambience full of light.

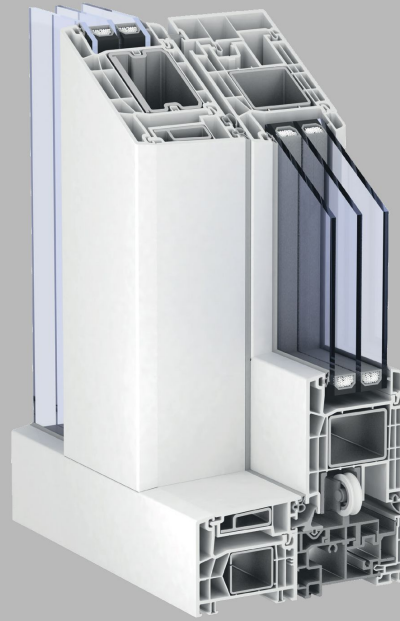

High energy savings

Large glass surfaces but still energy efficient. PremiDoor technology allows you to do just that, with its thermal insulation. Compared to conventional systems, thermal insulation can be improved by up to 32%.

Sliding system PREMIFOLD 76

PremiFold 76 is a special sliding system for windows and doors, and the latest in a long line of our sliding systems. The main advantage of the PremiFold 76 system is the way windows and doors can be opened to maximize ventilation without compromising safety. PremiFold 76 can be used for very large window openings.

Sliding system PREMISLIDE 76

Sliding system PremiSlide 76 is ideal for large buildings, offices or schools. With a value of 1.4 W / (m2K) in standard version, PremiSlide achieve the best energy efficiency in this class of products. Premislide 76 offers a wide range of colors in wood decor and metallic foil, including the AluClip variant, all available for individualized design.

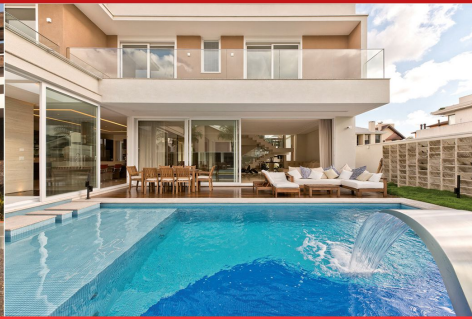

Special Eco Slide chain

A special EcoSlide chain was developed in collaboration with Siegenia, ensures perfect and durable functionality, and has a safety brake to fully prevent potential accidents and crushing of children's fingers.
